DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Kuborn on 2/15/08.

The application has been amended as follows:

1. A method for managing demand for a commodity provided by a utility company, the utility company delivering the commodity to a plurality of customer

sites, the customer sites each having a plurality of devices which use the commodity, including the steps of:

providing a plurality of nodes, each node being associated with a corresponding each device of the plurality of devices at the customer site:

defining an energy management program at the utility company having a subset of the plurality of devices for which usage of the commodity may be managed by activating the energy management program;

measuring, by each ~~the~~ associated node[[s]], the instantaneous rate at which the commodity is being delivered to the associated device,

receiving at the utility company in real time, the instantaneous rate at which the commodity is being delivered to each of the devices;

determining at the utility company, in real time, a capacity of the commodity that can be managed by the utility company by activating the energy management program, the capacity being determined by the instantaneous rate at which the commodity is being delivered to the subset of the plurality of devices;

selectively activating the energy management program at the utility company to manage the usage of the commodity by the subset of devices; and

determining an actual consumption of the commodity at each device of the plurality of devices at the customer site following activation of the program such that

the utility company can verify, in real time, management of the commodity usage for each device of the plurality of devices at the customer site following activation of the program.

29. A system for managing demand for a commodity provided by a utility company, the utility company ~~energy provider~~ delivering the commodity to a plurality of customer sites, each customer site having a plurality of devices which use the commodity, comprising:

a utility interface, operable by a user at the utility company, for defining an energy management program having a subset of the plurality of devices for which usage of the commodity at the customer site may be managed by activating the energy management program;

a distribution network for delivering the commodity to the subset of devices at the customer site;

a plurality of nodes, each node associated with a respective device of the subset of devices at the customer site; and,

a control system coupled to the utility interface, the distribution network, and the nodes, for reducing the delivery of the commodity to the subset of the plurality of devices by activating the energy management program via the nodes, wherein the

control system is operable to determine, in real time, a capacity of the commodity that can be managed by the utility company by activating the energy management program, the capacity being determined by an instantaneous rate at which the commodity is being delivered to each device of the subset of the plurality of devices at the customer site, wherein the control system is further operable to determine, in real time, an actual consumption of the commodity by each device of the subset of the plurality of devices at the customer site following activation of the energy management program.

Allowable Subject Matter

3. Claims 1-5, 7-10, 12-20, and 22-39 allowed.
4. The following is an examiner's statement of reasons for allowance. The prior art fails to disclose or suggest: defining an energy management program at the utility company having a subset of the plurality of devices for which usage of the commodity may be managed by activating the energy management program;

determining an actual consumption of the commodity at each device of the plurality of devices at the customer site following activation of the program such that the utility

company can verify, in real time, management of the commodity usage for each device of the plurality of devices at the customer site following activation of the program.

Specifically, the prior art fails to disclose determining an actual consumption of the commodity at each device of the plurality of devices at the customer site.

Additionally, the location of the energy management program at the utility is not suggested or taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
